CHAINS

The following field notes describe the survey of the Fifth Guide Meridian East, (east boundary), the west and north boundaries, and the subdivisional lines, Township 39 North, Range 20 East, Gila and Salt River Meridian, Arizona.

The south boundary was surveyed by Leonard R. Sandoval in 1997-98, concurrently under this same group.

The survey was executed in accordance with the specifications as set forth in the Manual of Instructions for the Survey of the Public Lands of the United States, 1973, and the Special Instructions dated June 6, 1996, for Group No. 802, Arizona.

The directions of all lines were determined, and distances measured, either by the technique of differential positioning using Trimble Navigation 4400 Series Global Positioning System receivers utilizing Real-Time Kinematic techniques, or with a Lietz SET4A total station instrument.

The geographic position of the southeast corner of the township was determined by the technique of differential positioning using the Ashtech M-Series Geodetic Positioning System. First order National Geodetic Survey triangulation stations "COAL MINE 1951" and "KAYENTA 1951" were used as control stations. The geographic position is as follows:

Lat.: 36°44'15.182" N. Long.: 110°07'41.000" W. NAD83(1992)

The mean magnetic declination is 12 1/2° E.

CHAINS	<p style="text-align: center;">GENERAL DESCRIPTION</p> <hr/> <p>The area surveyed is within the Navajo Indian Reservation, northeast of the community of Kayenta, Arizona.</p> <p>The terrain varies from rocky ridges in the southern and northern portions, to gently rolling land in Little Capitan Valley in the central portion. The drainage is easterly, with Laguna Creek being the principal drainage, which enters the township in section 31 and exits in section 36.</p> <p>The elevation varies from 5300 to 6100 feet above sea level. The soil is mostly sand and sandy clay with some rocky and sandstone outcrop areas. The timber is primarily piñon and juniper in the southern and northern portions of the township, with scattered brush and native grasses throughout.</p> <p>The principal access to the township is U. S. Highway 163, which enters the township in section 31 and exits in section 6. Navajo Route 6460, a graded road, starts in section 19 and exits the township in section 13. There are some graded roads and trail roads throughout the township. Much of the area is used for grazing livestock. There is no mining activity in the township.</p> <p>The mean magnetic declination is $12\frac{1}{2}^{\circ}$ E, as derived from the United States Geological Survey computer program GEOMAGIX utilizing the Regional Magnetic Field Model for Epoch 1995 for the dates of survey.</p> <hr/>
